

RETICLEIHR™

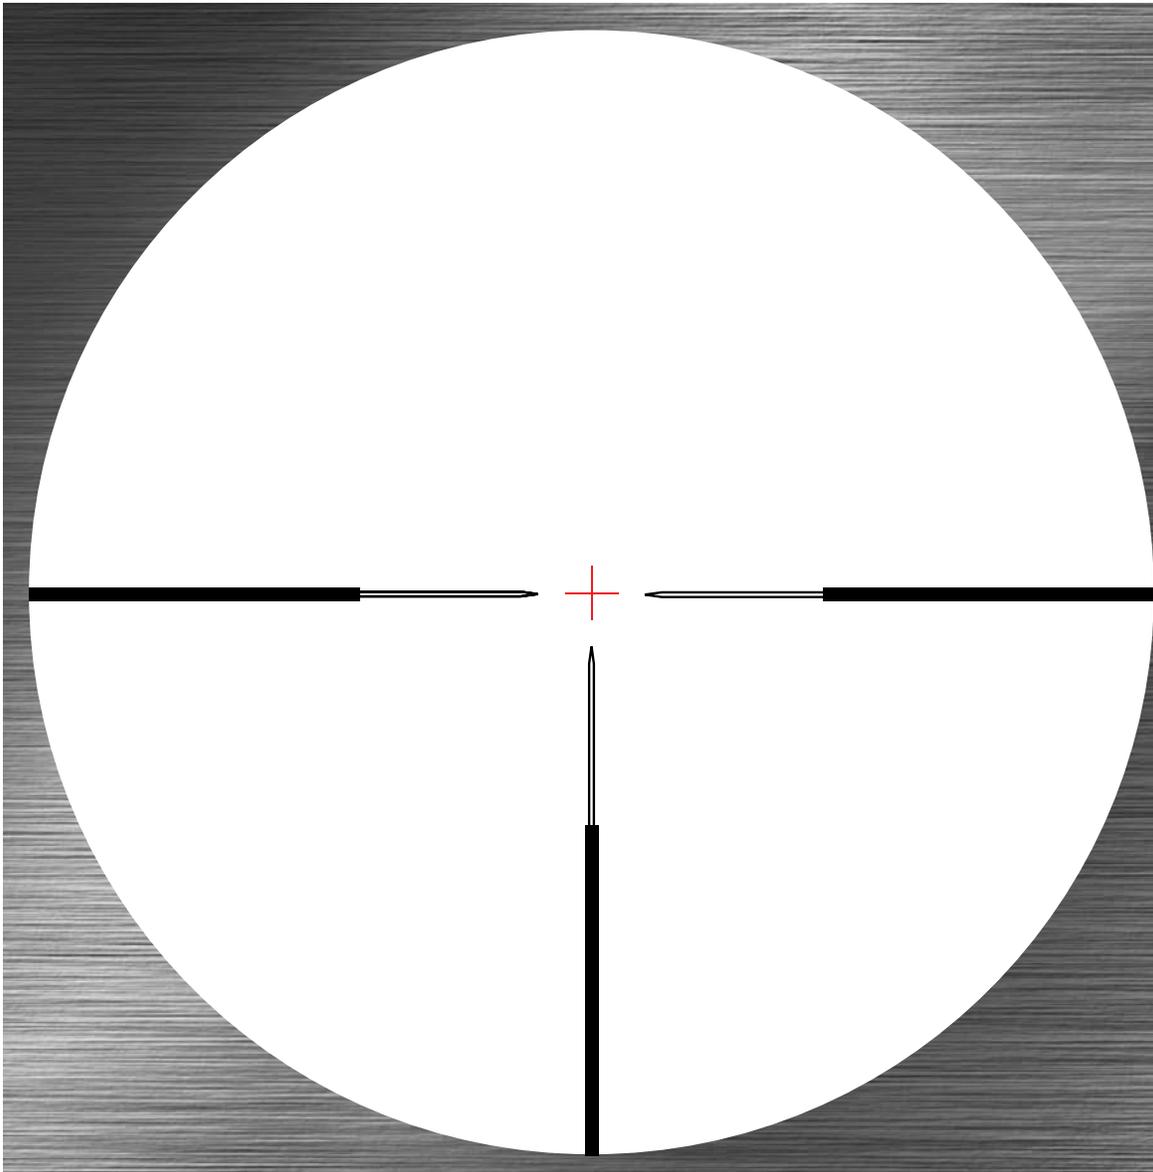

NIGHTFORCE®

Available in:

Nightforce 1-4x and 2.5-10x NXS™ riflescopes

Exceptionally fast, providing quick target acquisition
Equally effective on dangerous game in tight quarters
and on smaller targets at longer ranges

Red indicates illuminated portion of reticle

Applications:
General hunting
General shooting

Above: Brice Folden, host of Wild TV's popular Flatliner series, with a fine 53" kudu taken with his 2.5-10 x 32 NXS™ Compact. Brice traveled from New Zealand to Canada, on to London and finally to Johannesburg, and reported that in spite of "delicate" handling by the airlines, point of impact had not moved at all. "Nightforce scopes are the finest I've ever hunted with," Brice said.

RETICLEIHR™

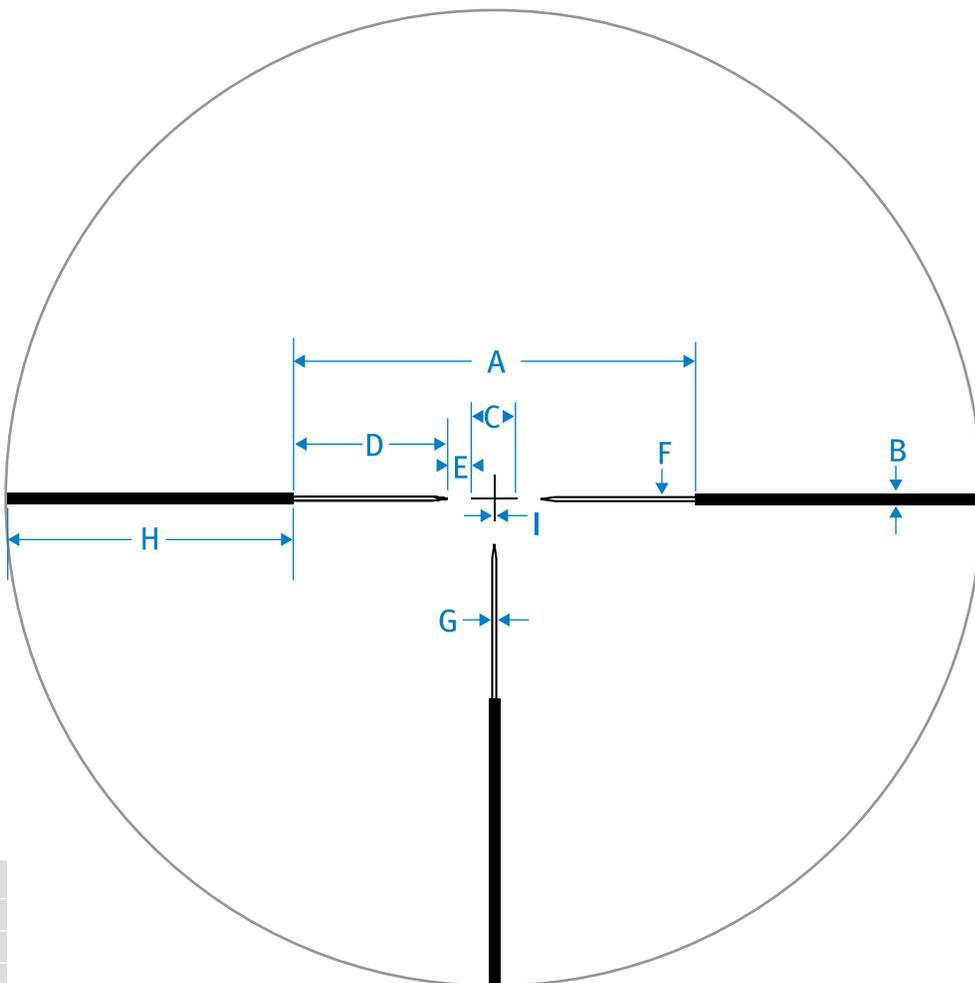

IHR™ stands for International Hunting Reticle (some would say Improved Hunting Reticle), with good reason. Most “hunting” reticles on the market are designed to work at either long ranges or short distances—but not both—limiting their applications and putting the big game hunter at a disadvantage. For the pursuer of dangerous game, a reticle that will not perform quickly at close ranges can have serious ramifications.

The IHR™ is ideal for dangerous game at close quarters. Substantial posts at the 3, 6 and 9 o'clock positions provide lightning-fast target acquisition, and its simple design provides a full, uncluttered view of charging or running game.

Conversely, when a smaller target presents itself at a substantial distance, the floating center crosshair provides a precise aim point, while still providing holdoff reference if needed. Adjustable illumination aids in accurate shot placement under adverse lighting conditions.

Armed with an IHR™, the hunter will be equally comfortable in the thick bush of Africa, the vast plains of the American heartland, and the rugged mountains of Asia. It is International in application and performance both.

- Floating center crosshair provides fast and precise aim point
- Uncluttered design provides full view of target
- 3, 6 and 9 o'clock posts aid in instant target acquisition
- Applicable to virtually any hunting environment

Reticle subtenions

	2.5-10X	1-4X
A	52 MOA / 15.13 MILS	138 MOA / 40.14 MILS
B	1.5 MOA / 0.44 MILS	4 MOA / 1.16 MILS
C	6 MOA / 1.75 MILS	16 MOA / 4.66 MILS
D	20 MOA / 5.82 MILS	53 MOA / 15.42 MILS
E	3 MOA / 0.87 MILS	8 MOA / 2.33 MILS
F	0.1875 MOA / 0.06 MILS	0.70 MOA / 0.20 MILS
G	0.75 MOA / 0.22 MILS	2 MOA / 0.58 MILS
H	37 MOA / 10.76 MILS	87.5 MOA / 25.45 MILS
I	0.18 MOA / 0.52 MILS	0.60 MOA / 0.18 MILS

Peter Moore, editor of the UK's Shooting Sports magazine, with a fine roebuck taken with a 2.5-10 x 32 NXS Compact. "Last hour of daylight," Peter said. "The field of view and low light performance are impressive, the reticle crisp and clear, plus the scope is nice and compact."

Please note:
Sound suppressors are both ethical and legal for hunting use in the UK.
