

Nightforce New Product Release - 1/4/16

FOR IMMEDIATE RELEASE - January 4, 2016

Dear ,

Nightforce Optics is proud to announce the release of two new riflescopes and four new additions to our line of premium mounting solutions! And, if you are attending SHOT Show this year, stop by and check out our new booth design (#20449).

A First Focal Plane SHV

Shooters looking for a more affordable, mid-powered first focal plane riflescope can now choose the new SHV 4-14x50 F1.

The New Featherweight

Short range benchrest, rimfire, and air rifle competitors will be now have the competitive advantage with the new featherweight Competition Fixed 42x44 riflescope tipping the scales at a mere 20 ounces.

New Mounting Solutions

And finally, the only way to improve a Nightforce riflescope is with a rugged, Nightforce Optics mounting solution. Four new additions, including: standard duty rings, a compact MagMount™, and two new accessory mounting platforms compliment our existing line of mounting accessories.

SHOT

If you are attending the 2016 SHOT Show, please stop by our booth (#20449) to view these new additions plus our entire line of premium optics and accessories.

Sincerely,

The Nightforce Team

Please forward to a friend!

We'd love to hear from you. Please feel free to connect with our Customer Service Department at info@nightforceoptics.com

SHV 4-14x50 F1

Capitalizing on the award winning success of our current SHV family, the new SHV™ 4-14x50 F1 delivers first focal plane performance in a mid-power package suitable for a wide range of shooting applications. The addition of this riflescope brings a first focal plane option to the SHV™ family. This design feature gives the shooter the option of precisely holding for elevation and wind, at any magnification setting by using the intelligence built right into the reticle.

Standard features include: a 30 mm body tube, 50 mm objective, exposed elevation and capped windage adjustments, and the choice of our MOAR™ or MIL-R™ first focal plane reticles.

Whether you're making adjustments on the fly for a quick shot on uncooperative game or venturing into the fast action found in the precision rifle sports, you can trust the SHV™ 4-14x50 F1 to deliver precision and speed.

Competition Fixed 42x44

When weight is critical, yet maximum performance is essential, our newest riflescope, purpose-built for the competitive shooter, is a game-changer. By eliminating the inherent weight of a variable-power mechanism, we were able to build the Competition™ 42x at just 20.7 ounces...without sacrificing the stunning images produced by ED glass and the robust mechanics for which we are known.

As with every Nightforce riflescope, the adjustments (1/8 MOA) track true and without backlash. The side parallax adjusts from 10 meters to infinity. And the fast focus eyepiece quickly tunes the etched glass reticle to your eye.

The game has changed. The Competition™42x44 is making the rules.

New Mounting Solutions and Accessories

Standard Duty Rings

An ideal combination of durability and value. Straightforward two-screw design simplifies installation and requires less front-to-back

clearance, for applications where rail space is limited. The positive locking jaw design and machined recoil lug provide perfect alignment for superior accuracy when mounted to Mil. Std. 1913 bases. Offered in four heights (.90, 1.00, 1.25, 1.50) for 30mm diameter tubes. An excellent mounting solution when partnered with a Standard Duty or X-Treme Duty™ base.

Ruggedized Accessory Platform (RAP)

Our Ruggedized Accessory Platform (RAP) provides four inches of rail space above your riflescope for mounting of lasers, illumination tools or other accessories. The RAP was optimized to withstand heavy recoil and still maintain zero with even delicate accessories or sensors. Designed to fit 4- and 6-screw X-Treme Duty™ rings.

MultiMount

The Nightforce MultiMount™ was originally designed as a platform for close-range sights to be mounted in conjunction with a primary riflescope. In practice, the MultiMount offers a user-configurable system that is rock-solid for nearly any accessory that will fit. Designed to fit 4- and 6-screw X-Treme Duty™ rings. Two Mil. Std. 1913 rails included.

Compact MagMount

The new Compact Magmount™ adds another rock-solid mount to the tough and reliable Nightforce Xtreme-Duty™ mounting family. With a titanium/aluminum construction, the Compact MagMount provides the performance of steel at half the weight. The Compact Magmount™ requires less rail space than the traditional Magmount, and is available to fit 30mm and 34mm riflescope tubes. Options available include both zero and 20 MOA of taper.
