

# NIGHTFORCE ACCESSORIES: MAXIMIZE THE PERFORMANCE OF YOUR RIFLESCOPE

Nightforce goes to tremendous lengths to make Rugged, Reliable, Repeatable riflescopes. However, the performance of our riflescopes is only as good as the Rings or Mounts holding the riflescope and the base attaching it to the firearm. Heavy recoil, rough handling, and harsh environments can cause issues on poor quality mounting components.

Nightforce Rings, Mounts, Bases, and Accessories are designed and built to Nightforce's demanding standards of precision for those looking to maximize the performance of their riflescope.

## X-TREME DUTY™ RINGS

Nightforce X-Treme Duty are our most rugged and advanced rings. A combination of steel, aluminum, and titanium materials are machined to precise tolerances, producing a lightweight and strong mounting system that ensures the riflescope is not subjected to stress, strain, or bending as the ring screws are tightened. Four-screw and six-screw versions are available in the following heights, diameters, and colors to suit a wide range of mounting applications.

### AVAILABLE RING HEIGHTS

- .885" 30mm ●
- 1.00" 30 or 34mm ● ●
- 1.125" 30 or 34mm ●
- 1.375" 30 or 34mm ● ●
- 1.50" 30 or 34mm ●

## ULTRAMOUNT™

The Nightforce UltraMount is a proven mounting solution, originally developed then chosen for the USSOCOM S-VPS, R-VPS, and P-VPS programs. It is an engineered combination of skeletonized aluminum, steel, and titanium that balances weight, strength, and stiffness to ensure a reliable and repeatable mounting solution for both bolt guns and gas guns. Also available separately is our new Rail Accessory Platform - Improved (RAP-i) that allows for mounting range finders, or miniature reflex sights.

### ULTRAMOUNT

- 30mm 1.54" height 0 or 20 MOA ● ●
- 30mm 1.93" height 0 MOA ● ●
- 34mm 1.54" height 0 or 20 MOA ● ●
- 34mm 1.93" height 0 MOA ● ●

### RAP-I

- 30mm ● ●
- 34mm ● ●

## X-TREME DUTY UNIMOUNT™

The Nightforce Unimount™ features a cantilever design that allows the scope to be mounted further forward than the rail length would typically allow. The Unimount™ design is particularly useful on AR-15, AR-10, and other semi-automatic rifles with a short receiver rail. An Extended Unimount™ and Service Rifle Unimount™ are also available that have additional cantilever when further eye relief is needed.

### UNIMOUNT™

- 30mm 1.125" height 20 MOA ●
- 30mm 1.375" height 20 MOA ●
- 30mm 1.5" height 0 or 20 MOA ●
- 34mm 1.44" height 20 MOA ●
- 34mm 1.50" height 0 or 20 MOA ●

### EXTENDED UNIMOUNT™

- 30mm 1.375" height 20 MOA ●
- 34mm 1.44" height 20 MOA ●

## X-TREME DUTY MAGMOUNT™ / COMPACT MAGMOUNT™

The Magmount™ and Compact Magmount™ allow clearance of 56mm objective riflescopes on rifles with continuous rails. The third crossbolt adds greater stability against the heavy recoil found on professional and competition bolt action rifles.

### MAGMOUNT™

- 30mm 1.375" height 0 MOA ●
- 34mm 1.44" height 0 MOA ●

### COMPACT MAGMOUNT™

- 34mm 1.5" height 0 or 20 MOA ●

## NIGHTFORCE ACCESSORIES: MAXIMIZE THE PERFORMANCE OF YOUR RIFLESCOPE

### X-TREME DUTY™ BASES

Precision machined to exact MIL-STD 1913 specification rail dimensions from a single billet of steel, they match the receiver contour ensuring true alignment. Rem 700 and Win 70 bases include an integral recoil lug which provides a precise fit, prevents movement, and reduces recoil stress on mounting screws. Standard with a 20 MOA taper, with a 40 MOA taper available for Rem 700 bases. Two-piece configurations available for Remington actions.

### STANDARD DUTY BASES

Nightforce Standard Duty bases are a quality, affordable solution for ensuring that your scope is firmly mounted to your rifle. These aluminum bases are machined to MIL-STD 1913 rail specifications and hard anodized. Available for a wide variety of firearms, including: Howa 1500, Remington 700, Savage Round Action, Tikka T3, Weatherby MKV.

### TOP RING ACCESSORIES

Levels, angle degree indicator mounts, and picatinny rail systems utilizing Nightforce's MultiMount system are available for the Unimount, Direct Mount, Magmount, and Ultralite rings in both 30mm and 34mm.

### TOOL KIT

The 10-piece Nightforce Tool Kit includes high-quality torque limiters, bits and drive tools in a zippered storage case that fits nicely in a range bag. Using proper tools and the recommended torque settings ensures your scope will stay in place during use and prevents over-tightening, which can damage scopes and affect accuracy.

### CLEANING KIT

The 12-piece Nightforce Cleaning Kit comes packed in a handy carrying case. It includes everything you need, plus instructions for proper care and cleaning of fine optics.

### LENS CAPS AND SUNSHADES

Sunshades reduce glare, while lens covers and lens caps provide maximum protection from damage and the elements.

### WEDGE PRISM

The Nightforce Wedge Prism is designed for shooting at ranges that exceed the elevation travel of the riflescope. The Wedge Prism optically shifts the incoming image to the riflescope by a precise elevation value, which directly adds to the available elevation travel of the system.

The Wedge Prism is offered in either 50MOA/14.5MRAD or 100MOA/29MRAD of optical shift. Each individual unit is measured and labeled with the exact optical shift for repeatable precision. A quick-detach mount provides a tool-less and repeatable attachment to a MIL-STD 1913 rail in front of the riflescope.
